

SNBTS HAI Reporting Template August/September 2009

1. Author(s) of Paper

Ann Paterson, Senior Nurse Infection Control, Health Protection Scotland/SNBTS
Anne Russell, Accommodation Services Manager, NSS Facilities
Being presented by: Irene Barkby, Executive Nurse Director, NHSNSS (Tel: 0131 275 6848)

2. Purpose of Paper

To inform the Board of HAI Report with regard to compliance with Hand Hygiene and Cleaning Specifications within SNBTS (August and September 2009).

3. Key Issues

SNBTS HAI Reporting Template

- This is the second SNBTS HAI Reporting Template providing information on compliance with Hand Hygiene and Cleaning Specifications.
- **National data** - The National Hand Hygiene Campaign Compliance with Hand Hygiene Audit Report for July 2009 reported an overall result for hand hygiene compliance of 93% (20th to 31st July 2009). Compliance percentages within NHS Boards ranged from 90% to 99%.
- **SNBTS data** - SNBTS hand hygiene compliance score for August and September was 96%. Compliance percentages ranged from 90%-100% with a total of 450 opportunities being observed.
- Benchmarking shows that SNBTS data is slightly above the national average, however there are no confidence intervals for this data therefore at present we are uncertain whether this is of statistical significance.

Please note that although SNBTS data is reported to SGHD it is not part of the National Hand Hygiene Campaign Data due to the variances in healthcare provision and therefore NSS's ability to capture the national data set.

- **Cleaning Monitoring** - The cleanliness monitoring report provides data on NHS NSS compliance with requirements set out in NHSScotland National Cleaning Specification.
- Cleanliness is assessed using an observation process in accordance to technical requirements set out in the aforementioned National Cleaning Services Specification.
- Areas to be monitored are selected at random in accordance with the Monitoring Framework guidance.
- NHS National Services Scotland provide reports on 2 sites in Edinburgh and 3 sites in Glasgow:-
 - Lauriston Donor Centre(Mobile Donating Centre)
 - SNBTS Liberton Site
 - Athenaeum Donor Centre
 - Gartnavel and Possilpark (Mobile Donating Centres)

- All of the other centres are located on NHS Board sites and are cleaned and monitored by each Board's domestic departments, monitoring results from these locations are recorded in Board score.
- It was agreed that all boards should attain green status – above 90%, with an action plan in place for any areas that fall below 90%.
- Since commencing reporting NHS NSS quarterly overall total percentage has been above 94% (annual 98%). One individual site has been below 90% and rectifications for this site have been completed.

4. Financial Implications

No financial implications relating to this report.

5. Resource Implications

No resource implications relating to this report.

6. Contracts

Not applicable to this report.

7. Risk Implications

Risk to reputation and blood supplies if Mobile Donation Units or blood collection premises are perceived to have unsatisfactory levels of cleanliness.

8. Equality & Diversity Implications

There are no Equality & Diversity implications associated with the paper.

9. Partnership Working

No specific partnership issues related to this report.

10. Recommendation(s) for Decision

To note compliance with hand hygiene and NHSScotland National Cleaning Specification.
